The global leader in
door opening solutions

Who We Are

Federal & state government agencies, including large Department of Defense & VA Medical Centers across the globe, rely on ASSA ABLOY solutions for the safety and security of their facilities. Our door and hardware solutions, along with our perimeter security and identification technology address the most stringent building codes and security regulations, as well as the latest sustainable procurement guidelines. As a strategic partner for your facilities and security planners, we can help sort out the details and keep facilities, information and people safe without sacrificing convenience or interrupting day-to-day operations. ASSA ABLOY answers these challenges with the broadest range of product solutions and services in the industry.

Complete Facility Security

Durable, reliable, sustainable and a full range of functions for any application

Whether your facility is a large military installation, a Veteran Affairs Medical Center, or a singular government building, ASSA ABLOY ensures every opening is properly protected. This includes perimeter gates/fencing and traditional, specialty blast, ballistic, and acoustic doorways, as well as interior cabinets and data closets. Careful consideration of each opening based on usage and risk allows for the proper selection of access control, enhancing the security of your facility while keeping costs in line.

High security fencing and barrier systems

Blast Resistant Door Openings

CORBIN RUSSWIN, SARGENT and YALE mortise locks are rated for blast resistance

- Door, Frames & Locking Hardware
 - Hollow Metal, Wood and Specialty Doors
 - Mechanical Hardware
 - Keypad Access Control
 - Access Control Solutions (Offline, Online, Wireless, POE)
- Intelligent and Mechanical Key Systems
- Access Control, Egress Hardware and Accessories
- Door Controls
- Perimeter Security
- Identity Management
- Sliding, Swinging and Revolving Automatic Door Controls

Commitment to Sustainable Solutions *for Public Procurement*

The demand for sustainable security products is significant and is tied to the rise of green building rating systems like LEED and the Living Building Challenge. These voluntary green building systems are now becoming part of code through

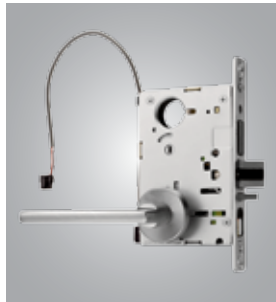

the IgCC and Net Zero Energy Building initiatives passed by state and federal governments. ASSA ABLOY leads the transparency initiative toward Environmental (EPD) and Health (HPD) Product Declarations and carries the

highest certifications for environmental safety. In fact, many of our online electronic access control systems are green by default, featuring patented innovative designs that require as little as 2 amps of power to operate.

High performance doors, frames, gasketing and hardware at NREL in Golden, CO assisted the building envelope in achieving net-zero energy.

Many of our field representatives are LEED accredited professionals who will design your openings to deliver maximum sustainability values. ASSA ABLOY Group brands offer assistance in the following green building contributions.

- Energy and Atmosphere (EA)
- Indoor Environmental Quality (IEQ)
- Exterior door openings - control energy efficiency throughout the building envelope
- Interior door openings - control airflow, humidity and temperature throughout the facility
- Sustainably Sourced Materials and Resources
- End-of-Life Recycling Program
- GREENGUARD™ Gold Certifications
- Enhanced acoustical performance through STC rated openings
- Transparency (Environmental (EPD's) and Health (HPD's) Product Declarations)

Government Procurement and Contracting Support

The ASSA ABLOY Government team understands the requirements for federal, state and local agencies to solicit/procure according to their applicable acquisition regulations. We have a large network of distribution partners strategically aligned to support the Government

customer's preferred method of procurement. This includes partners who hold GSA Federal Supply Schedules 51V, 56 and 84; numerous Small, Minority & Disadvantaged "set-aside" partners and others that hold various state/local contract vehicles. After a particular

solution is identified, our Government team can further provide technical and salient characteristics of these products via a Technical Statement of Work to be incorporated in to future Requests for Proposals.

Other Valued Services

Our product, technical and architectural experts are committed to providing programs that help keep you informed. Our teams are always available to listen to your unique requirements and develop a customized opening solution.

Please contact your local ASSA ABLOY DSS Government representative at www.assaabloydss.com/government for specific information regarding product compliancy.
