

COMMITMENT TO SUSTAINABILITY

Sustainable Building Solutions

ASSA ABLOY opening solutions provide security, life-safety and convenience to building occupants. In the past decade special consideration has been paid to the sustainability of products and how they can assist building designers. The demand for ASSA ABLOY products that meet this need is significant and is tied to the rise of green building rating systems like LEED and the Living Building Challenge. These voluntary green building systems are now becoming part of code through the IGCC and Net Zero Energy Building initiatives passed by states and the federal government.

ASSA ABLOY Group brands can assist green buildings in the categories of:

- Doors and Frames Certified to GREENGUARD™ Gold
- Energy Efficiency
- Health Product Declarations
- Sound Transmission Class Door Openings
- Sustainably Sourced Materials

Trio-E insulated, steel stiffened door from CECO DOOR, CURRIES, and SMP SPECIALTY DOORS and seals and thresholds from PEMKO

Wood doors from GRAHAM and MAIMAN are made from up to 100% recycled content and rapidly renewable

LumiLite™ from YALE requires no electrification, making it ideal for retrofit applications

Green Building Organizations

In furthering our commitment to sustainable construction, ASSA ABLOY is proud to be a member of many local, national and international organizations. The common denominator among these organizations is to develop a more sustainable construction industry and bolster the supply of sustainable real estate.

CARBON DISCLOSURE PROJECT

Doors, Hardware & Access Control Solutions for Retail Environments

ASSA ABLOY

The global leader in door opening solutions

Who is ASSA ABLOY Door Security Solutions?

ASSA ABLOY Door Security Solutions provides end-users with unsurpassed security, life-safety, aesthetic and sustainable solutions, as well as essential support services to ensure well-functioning doorway systems. Our industry leading door and hardware brands offer products that together create comprehensive solutions for any retail opening, from exterior and interior doorways, to offices, storage rooms, cabinets and supply closets.

ASSA ABLOY simplifies doorway challenges in retail, offering:

- **Convenience**— work with one team of experts for all door and hardware needs
- **Performance and Selection**— choose from the industry’s widest offering of quality products for automatic entrances, along with all interior and exterior doorways
- **Distribution**— products are readily available through a large network of distributors throughout the United States, Canada and international markets
- **Knowledge**— rely on our expertise in specifications, code compliance and key systems guidance

The ASSA ABLOY Retail National Account Program will:

- Review specifications for code compliance, cost savings and sustainable building design
- Provide product recommendations
- Create a leveraged buying program

LIFE-SAFETY INNOVATIONS

Our most important goal is ensuring the safety of building occupants. Hurricanes, tornados, fires and other dangers, even microbes and volatile organic compounds, can pose life-safety threats. Our Group brands help protect against these hazards with doorways designed and tested to overcome extreme conditions. Contact ASSA ABLOY code consultants for local code information.

Antimicrobial Doors, Frames and Hardware

Facility hygiene programs emphasize the cleanliness of high-touch building components such as doors, frames, levers, exit devices, push plates and pull bars. MicroShield® antimicrobial finishes and coatings inhibit the growth of microbes on door opening surfaces, contributing to a cleaner facility for the life of the door and hardware finish.

Egress Doors and Hardware

Exit devices or panic hardware facilitate safe and easy egress while maintaining security by restricting access from the outside. Delayed egress exit devices help keep occupants safe and may prevent property loss or theft.

Windstorm Solutions

ASSA ABLOY Group brands offer windstorm rated opening assemblies, consisting of doors, shutters, frames and hardware for tornado or hurricane resistance. These assemblies have been tested and listed with third-party certification agencies to ensure code compliance in these specific applications.

SECURITY & LOSS PREVENTION

Every door opening in a building is different. Each has unique usage requirements. Careful consideration of each opening based on usage and risk allows for the proper selection of access control, enhancing the security of a facility and keeping costs in line.

Key Systems Management

Key systems come in levels from basic to high security patented control. Our specially-trained consultants work with owners to create a formalized key control system.

Mechanical Locking

Solid and reliable mechanical hardware is the foundation of effective security. ASSA ABLOY Group brands provide a complete range of commercial-grade locks, exit devices and door closers that far exceed industry standards.

- Aluminum narrow stile hardware
- Cylindrical locks
- Deadbolts
- Door closers
- Exit devices
- Mortise locks

Electronic Access Control

Networked or stand-alone access control locking hardware provides a cost-effective solution to enhance security from exterior doorways to interior storage cabinets.

- eCylinders
- Integrated Wiegand
- Intelligent WiFi Access Control
- Keypad Locks
- Offline Access Control
- Online Access Control
- PoE (Power over Ethernet)
- Seos - NFC Mobile Access Control
- Touchpad Access Locks

Security Continuum

ASSA ABLOY offers a complete range of technologies with increasing capabilities designed to address security requirements in today's retail environments.
