Location: Chicago, IL

Complete Doorway Solutions: doors, locking devices and trim, key systems and door controls

Result: 223 door openings spanning adolescent behavioral health, obstetrics and other patient rooms; resulting in patient safety, contemporary aesthetic, unified keying and secure, durable openings

## Profile: Roseland Hospital

ASSA ABLOY joined with the designer and general contractors to forge a working relationship with the hospital. Roseland Hospital's Director of Facilities and Construction commented, "It was easy to select and partner with them to come up with the most creative solutions." The combination of commitment, education and resources that ASSA ABLOY provided were key to the success of the project.

## Functional Doorways

Combine doors, frames and accessories to provide a cost effective range of solutions with increasing capabilities that meet security and safety requirements.

## Performance

Combine security with aesthetic, functional design. Customize openings with hands-free capabilities for ease of use.

## Safe Egress

Provide your facility with an added level of door locking control. Exit devices facilitate safe and easy egress while maintaining security by restricting access from the outside.

## Perimeter Security

Add a touch of elegance by uniting your facility with the perimeter through stylish design that yields sophisticated protection and minimizes risk of elopement.

## Door Control

Light duty, heavy duty and specialty application solutions protect your facility from perimeter gates to interior cabinets.

## Flexible Security

From mechanical locks and keys to intelligent openings, careful consideration of each doorway opening based on usage and risk allows for the proper selection of access control, enhancing the security of your facility while keeping cost in line.

## Regulatory Compliance

- CMS Compliance (The Joint Commission, DNV, HFAPS, etc)
- Accessibility - ADA
- HIPAA
- Patient and asset protection
- Emergency egress
- Audited access and tracking
- Fire-rated doorways

## Caring Technology

- Wi-Fi enabled and wireless access control minimize disruption in installation
- RFID card readers provide transparent security
- Open architecture access control platforms mesh with your existing systems
- Offline/Online access control combines simplicity and convenience
- Product engineering ensures the right solution for every application

## Safety & Security

- Access control from mechanical key systems to electronic solutions
- Pharmaceutical inventory protection
- Delayed egress to address patient wandering
- Safekeeping of business and patient records

## Smart Design

- Patient-safe doors and hardware create a restorative behavioral health environment
- Products that optimize energy efficiency and acoustic control also contribute to LEED credits
- Design flexibility and decorative finishes update facility aesthetics
- Bullet/blast and windstorm solutions tested to meet the most stringent code requirements
