

K-12 School Safety and Security Assessment Program

ASSA ABLOY

The global leader in
door opening solutions

As the global leader in door opening solutions, ASSA ABLOY fully understands the significant role that properly functioning doors and hardware plays in maintaining the safety of students and staff. Doorways are complex systems that are often overlooked during routine building inspections. Our K-12 security professionals offer complimentary site assessments to help school districts and educational organizations determine the condition and readiness of all facility doorways.

What does security look like at your school?

Each school has unique security requirements. Security needs may vary depending on:

- Type of school
 - Elementary school, middle school, high school
- Design of the school and classrooms
 - Traditional, open/pod, campus design
- School district's vision of security
 - Desired level of access control
- Opening type
 - Classroom, auditorium, office, entrance, exterior door

ASSA ABLOY K-12 Safety and Security Program

Take control of school safety and security by scheduling a complimentary site assessment survey with a local ASSA ABLOY Door Security Solutions representative.

STEP 1

Clearly identify / define expectations

- What is classroom security
- What is lockdown
- Door opening operational functions

STEP 2

Evaluate current policies and practices

- Key control
- Building access & time schedules
- Visitor policy
- Lockdown policy
- Commitment to security over conveniences

STEP 3

Assess existing openings to ensure current security is fully functional

- Assess each component of opening system
- Identification of lock function

STEP 4

Prepare plan to address security concerns

- Review action items identified during audit and present locking options
- Review existing security status against the desired level of security defined in step 1
- Evaluate integrity of master key system
